Subject: RE: Questions regarding EPA School Bus Funding Application

I think directing them to the helpline is fine. Based on our Q&A document and Program Guide I believe they are eligible applicants. If BYD is the applicant, then they need to be registered in sam.gov; however, the school district would not need to be. We would then pull the school district information from the NCES District ID that is entered.

This is a little odd since we had a detailed meeting with BYD last week. Assuming we direct these questions to the helpline, correct? If so I can send a short response and cc the helpline inbox. Thanks.

Subject: Questions regarding EPA School Bus Funding Application

Hello Michael,

Hope you are doing well.

Allow me to introduce myself, I am Susannah Song, with BYD Coach & Bus, a U.S.-based electric vehicle manufacturer. Currently, we are applying for the EPA's new Clean School Bus Program funding on behave of our client (school district) and have some questions regarding the funding application. Hope you could help us to answer, thank you:

1. Is OEM able to apply the funding for the school district?
2. If yes, should we register the school district as a new entity on our sam.gov? (Please see the below image for your reference)
3. If yes, do we need to get all the entity information, including but not limited to financial information, Executive Compensation Questions, Representation and certifications, etc.?

Thank you very much for your time in this effort, we are looking forward to your reply.
